

DELIVERY PROHIBITION/RED TAG

**NO QUESTIONS ON RED TAGS ARE ON THE
EXAMS**

REASONS FOR DELIVERY PROHIBITION

WWQRR, Chapter 17, Section 44 Page 17-95

- Have not performed tank leak detection in 60 days
- Did not perform CP test within 90 days of due date
- A CP test failed and was not repaired and retested within 90 days of the original fail date
- Pressure test or line tightness test was not performed within 60 days of due date.

REASONS FOR DELIVERY PROHIBITION

- Failure to function test line leak detectors within 60 days of due date
- Failure to report and investigate a suspected release
- Owner/operator (O/O) reported a release but failed to investigate within 7 Days
- O/O reported a confirmed release but repairs were not made

REASONS FOR DELIVERY PROHIBITION

- O/O has failed to pay the fees by September
- O/O has failed to follow an Order issued by the department
- If monitoring devices have been purposely tampered with or turned off
- If any records have been falsified
- If tank does not have overfill or spill prevention devices

REASONS FOR DELIVERY PROHIBITION

- If a steel tank does not have CP system in place
- If an AST has not been upgraded under Part I
- If an OAI has not been performed within 90 days of due date
- If there has been no class B operator for 90 days or more after the initial 6 month grace period

NOV WITH ORDER IS ISSUED

- A Notice of Violation (NOV) with Administrative order is issued
- A copy is sent to the fuel delivery company
- Anyone that intentionally delivers fuel to a red tagged tank is violating the order
- A list of red tagged facilities are listed on our website
