1. Sage Grouse Core Area Determination

Pursuant to the requirements of the Governor's Executive Order 2011-5, Greater Sage-Grouse Core Area Protection, the Wyoming Department of Environmental Quality (WDEQ) is working with the Wyoming Game and Fish Department (WGFD) to minimize the impact of development on the Greater Sage-Grouse population in Wyoming. To that end, operators of large construction projects must determine if any part of the project falls within a Greater Sage-Grouse Core Area (SGCA) before applying for coverage under the Large Construction General Permit (LCGP). If any part of your project falls within a SGCA, the first point of contact for addressing sage-grouse issues is the WGFD. Coordinate with the WGFD and obtain a letter confirming consistency with the Executive Order prior to applying for coverage under the LCGP. Additional information and a map of SCGAs are available at http://deq.state.wy.us/wqd/wypdes_permitting/wypdes_storm_water/stormwater.asp.

Some part of my project does fall within a SGCA → Contact WGFD for a consultation to address sage-grouse issues and obtain a letter confirming consistency with the Executive Order. (Note that your NOI will be returned without processing until you have consulted with the WGFD and obtained a letter confirming consistency with the Executive Order.)

Some part of my project does fall within a SGCA and I have contacted the WGFD for a consultation. A letter from the WGFD confirming consistency with the Executive Order is attached.

No part of my project falls within a SCGA → No additional requirements. Complete and submit your Notice of Intent.
